Mike –

On October 18th there is a City meeting with the Department Directors, during which certain departments report on recent projects. We will be presenting on a our BWC project. I'd like you to put together a simple power point presentation. I'd like to share some of the features of the BWCs, in car MAV, how they interact with LPR etc. I'm sure they would like to see some real footage. If you could put together some simple, we can work together to put the finishing touches on it.

Dan Cohen, Division Commander
Santa Maria Police Department
